## ABOUT THE SEMINAR

Violence against women in its various forms is a violation of human rights, the very nature of which deprives women of their ability to enjoy fundamental freedoms. It is a serious obstacle to equality between women and men and perpetuates inequality. Violence against women intersects with multiple forms of discrimination. Violence against women remains hidden in the culture of silence.

Violence against women has consequences for women's health and well-being. Besides, it carries a heavy human and economic cost, hinders development. There is need to break the silence and ensure that violence against women is not just a woman's issue but primarily a political, social, economic and cultural issue that concerns men as well. With this backdrop, we proposed to organize a National Seminar on Elimination of Violence Against Women: Issues and Challenges.
